                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Sequence 10, Application US/09520781

Sequence 10, Application US/09520781

Patent No. 6689866

GENERAL INFORMATION:

APPLICANT: Shimkets, Richard A.

TITLE OF INVENTION: NOVEL POLYNUCLECTIDES AND PROTEINS ENCODED THEREBY

TITLE OF INVENTION: NOVEL POLYNUCLECTIDES AND PROTEINS ENCODED THEREBY

CURRENT APPLICATION NUMBER: US/09/520, 781

CURRENT APPLICATION NUMBER: US/09/520, 781

PRIOR APPLICATION NUMBER: US/09/520, 781

PRIOR FILING DATE: 1999-03-09

NUMBER OF SEQ ID NOS: 81

SOFTWARE: Patentin Ver. 2.0

SEQ ID NO 10

                                                                                                                                                                                                                                                  NUCLEOTIDE SEQUENCE.
Genoscope; Whitehead Institute Centre for Genome Research;
Submitted (FEB-2004) to the EMBL/GenBank/DDBJ databases.
-!- CAUTION: The sequence shown here is derived from an
EMBL/GenBank/DDBJ whole genome shotgun (WGS) entry which is
preliminary data.
                                                                                                                                                                                                 513 AALAAVGAAYCVRRGRAMAAAAQDKGQVGPGAGPLELEGVKVPLEPG---PK
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 EMBL; CAAE01014535; CAF97214.1; -; Genomic DNA.

Proc. Natl. Acad. Sci. U.S.A. 99:16899-16903(2002).

1- 'SUBCELLULAR LOCATION: Type I membrane procein (Potential).

-!- SIMILARITY: Contains I fibronectin type-III domain.

-!- SIMILARITY: Contains I Ig-like (immunoglobulin-like) domain.

-!- SIMILARITY: Contains 7 LRR (leucine-rich) repeats.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       (Potential).
